## *Memorandum*

TO: BATA Oversight Committee

DATE: December 2, 2009

FR: Deputy Executive Director

W. I. 1251, 1256

RE: San Francisco-Oakland Bay Bridge Update

BATA, Caltrans, and California Transportation Commission staffs will provide the Committee with updates on a number of items related to the San Francisco-Oakland Bay Bridge (SFOBB).

- A. Update on progress on the SFOBB East Span Replacement Project; including a status report on the Self-Anchored Suspension Span (SAS) and other contracts.
- B. Update on eyebar repair on the existing east span of the SFOBB; including a recommendation by staff to the Committee to refer an amendment to the Toll Bridge Program Rehabilitation Plan (BATA Resolution No. 86, Revised) to allocate a to-be-determined amount of Toll Bridge Rehabilitation Program funding for the proposed long-term repair of the eyebar. The allocation will include funds for BATA to provide consultant review of the long term repair. Staff recommends that T. Y. Lin International, an on-call consultant to BATA, perform the review, given their familiarity with the existing east span and the urgency of the work. Staff will bring forward the allocation request directly to Committee with a detailed estimate for the project, as well as a recommendation that the Executive Director negotiate and enter into a contract amendment with TY Lin to perform consultant review of the repair in an amount to be presented at the meeting.
- C. Report on operational and speed enforcement strategies that have been implemented and are planned to reduce incidents at the S-curve of the Yerba Island Detour.
